

IBP Programme 2018

Systems that learn

27 February 2018

How can data analytics improve the way humans organize themselves and how can machines radically improve the way they support humans? A one-day conference **in collaboration with the Massachusetts Institute of Technology and BT group PLC.**

Women@Imperial

15 March 2018

A discussion on how Gendered Innovations in Imperial's curriculum should better prepare graduates for business, as part of Women@Imperial week. The event follows a lecture by Professor Londa Schiebinger, Stanford University and Imperial Vice Provost (Education), Simone Buitendijk.

The future of finance

19 April 2018

IBP FinTech members will enjoy a VIP breakfast as part of Imperial College Business School's annual one-day conference, which explores future global challenges and opportunities in the finance sector and their likely impact on policy.

Best of enterprise week

24 April 2018

Meet Imperial's home-grown entrepreneurs, social innovators and talented students and researchers as we bring you the winners of all the College entrepreneurial competitions, in our yearly session only for IBP members. **In collaboration with the Enterprise Lab.**

Clean growth

8 May 2018

A showcase of early stage climate mitigation technologies, in the yearly IBP discussion on climate change, **in collaboration with Imperial's Energy Futures Lab and Grantham Institute for Climate Change and the Environment.**

Tech Foresight 2038

14 June 2018

Scientific breakthroughs enable us to see, understand, and interact with the world differently. Programmable material permits us to make static matter come alive, and analytics is making the invisible visible, heralding in an era of cognitive discovery. Join us in this journey **with Imperial Tech Foresight.**
